

Serial No. 10/064,326

Amendments to the Drawings:

The attached drawing sheet includes new FIGS. 2 and 3 that are perspective views of FIG. 1.

Attachment: New Sheet

Serial No. 10/064,326

REMARKS

Reconsideration of this application as amended is respectfully requested.

FIGS. 2 and 3 have been added to clarify the invention. FIGS. 2 and 3 are perspective views of the housing of FIG. 1. No new matter has been added.

The specification has been amended to clarify that "substantially planar" is not limited to flat surfaces but also covers contoured surfaces, as shown in FIG. 1 and clarifying FIGS. 2 and 3 showing perspective views of the housing of FIG. 1.

Claims 1, 6, and 10-12 have been amended and claim 3 has been cancelled.

Claim 1-4 and 6-14 were rejected under 35 U.S.C. 112, as failing to comply with the enablement requirement because claim 1 includes subject matter not described in the specification in such a way as to enable one skilled in the art to which it pertains. Claim 1 has been amended to overcome this rejection.

Claims 1, 2, 4, and 6-14 were rejected under 35 U.S.C. 102(e) as being anticipated by Wessel. Claim 1 has been amended to recite that the closure member has a substantially constant thickness. Wessel fails to disclose a closure member having a substantially constant thickness. Accordingly, the rejection of claim 1 should be withdrawn.

Claims 2, 4 and 6-14 were rejected as claim 1 under 35 U.S.C. 102(e). Since claims 2, 4 and 6-14 depend directly or indirectly from and contain all the limitations of claims 2, 4 and 6-14 as amended, they are felt to overcome the rejection in the same manner as amended claim 1.

Claims 1 and 3 were rejected under 35 U.S.C. 102(e) as being anticipated by Kawakami. Claim 1 has been amended to recite a liftable closure member and that

Serial No. 10/064,326

the installation opening is uncovered by lifting the closure member. Support for this amendment is found in the specification at paragraph [0021]. In contrast, Kawakami discloses a maintenance cover 54 that slides along rails 50 and 52 to uncover the access opening 44. Accordingly, Kawakami fails to disclose a liftable closure member that is lifted to uncover an installation opening as claimed in claim 1. Therefore, the rejection of claim 1 should be withdrawn.

This amendment is believed to be fully responsive to the comments and suggestions of the Examiner and to place this application in condition for allowance. Favorable action is requested.

Respectfully submitted,
GEORG BLASCHKE
